Causa: Dosagem inadequada de reagente; Medida: Correção da dosagem de reagente no tratamento, Análise de Verificação Realizada dia 28/01/2024 - Resultado ON/100mL

Indicador de um tratamento deficiente. A presença de E. Coli na água de consumo humano, indica habitualmente, contaminação de origem fecal. A E. Coli produz uma toxina muito nociva, podendo causar danos graves, pelo que se deve assegurar uma desinfecção eficaz
